Sci-Map Site
San Felasco Hammock Reserve

Name of Activity
Observation Practice

Before, While, or After?
Before You Go

Materials
See attached files.

Procedure
Open the first file and see if you can spot the differences in the photo. Check yourself with the answers in the second attached file.

The Science Behind It
Scientists observe things in order to understand them. Sometimes it is difficult to distinguish things without practicing your observation skills. You also need to be patient and persistent. Here is an activity that can build your observation skills if you keep at it!
